Re: U.S. Patentability Search
Docket No. 21526.08

Dear Mr. Litman:

I reviewed the fax copy of the letter accompanying the search report for the above invention, which is a Method of making airline luggage inspection secure while accommodating the needs of the traveler. Your report to me describes the invention as a kind of lock and discusses the patentability of the lock. The invention described to you was specifically directed to a method that makes use of a lock rather than to a lock itself and I need a report which addresses itself to the invention as a method rather than just the lock. Could you please revise the report?

Please note that this is an expedited search.

Thank you.

Very truly yours,

Steven Horowitz
